

# BlueConnect - Hands Free Driving

BlueConnect is an in-vehicle Bluetooth® handsfree system. BlueConnect has been validated to leading OEM standards. Drivers with Bluetooth mobile phones can use their phones while keeping their eyes on the road and their hands on the wheel.

## What is Bluetooth?

Bluetooth is a wireless technology for electronic devices to communicate with each other. The Bluetooth mobile phone communicates with the hands free Bluetooth device in the vehicle. In 2006, more than 50% of all new mobile phones in the U.S. will be Bluetooth enabled through all major carriers including Verizon, Cingular, T-Mobile, Sprint, Nextel, and others.

## How does BlueConnect work?

The consumer needs to have a compatible Bluetooth mobile phone as well as the BlueConnect® system installed in their vehicle.

- ◆ One-time phone pairing to BlueConnect system will automatically recognize paired Bluetooth phone upon starting the vehicle
- ◆ Handsfree calling using voice commands
- ◆ Enter and exit vehicle without losing connection – seamless communication

## BlueConnect Features:

- ◆ Hands free dialing can pair up to several Bluetooth phones
- ◆ No messy wires or dangling microphones
- ◆ Validated to leading OEM standards
- ◆ Friendly and knowledgeable customer support
- ◆ Industry leading voice recognition
- ◆ Built-in noise and echo cancellation
- ◆ No additional electrical parts needed

## MORE FEATURES

- ◆ Easy Voice Set Up & One Touch Activation
- ◆ Industry Leading Speech Recognition & Voice dialing
- ◆ Multiple Phone Pairing (up to 7 phones)
- ◆ Industry Leading Noise Reduction & Echo Cancellation
- ◆ Fully Integrated Speaker & Microphone
- ◆ Three Way Calling Capability
