

Bluetooth - Parrot 3100 LCD

First Bluetooth® Handsfree car kits with LCD display

The Parrot CK3100 LCD is the most advanced hands-free car kit on the market. With the Parrot CK3100 LCD, you will be able to place and receive calls in comfort and safety, without ever touching your mobile phone. The wireless connection between the Parrot CK3100 LCD and the *Bluetooth* phone and its voice recognition system is enabled as long as the phone is turned on. At a time when legislation is tightening up to restrict the use of mobile phones in vehicles due to safety concerns, Parrot CK3100 LCD benefits are not just for the sake of convenience and comfort - they are fast becoming a real necessity.

Make calls in complete safety with the voice recognition feature

When users get in their car, they start the engine and the kit immediately connects to their mobile phone. Thanks to the voice recognition feature, drivers say a name and the kit automatically dials the number in complete safety.

Find your mobile phone's information on a small LCD screen

The kit displays your mobile phone's information on an LCD screen : incoming call number, phonebook, last number called, and so on. The ingenious screen can be installed wherever users want on the dashboard and provides an optimized viewing angle for greater comfort and readability.

Choose a kit that integrates seamlessly into your car for real audio quality

The car's speakers accurately reproduce the caller's voice. The microphone captures the sound of your voice while filtering out the surrounding noise.

In the event of a call, the car radio automatically cuts out to allow for a smooth conversation.
